

The University of Miami Health System is initiating a search for a Clinical Pathologist (expertise in Head and Neck Pathology desired).

Essential Job Functions:

- Patient care services, for patients at UMH (University of Miami Hospital), JMH (Jackson Memorial Hospital) and satellites and SCCC (Sylvester Cancer Comprehensive Center) and satellites. Patient care service responsibilities will be focused on the assigned specialty or specialties
- Gross description, taking photographs of the specimens when indicated, tissue sampling, microscopic examinations of surgical specimens, reporting of findings, and verifying coding diagnosis in the computer.
- Performing Frozen Section diagnoses.
- Performing and reporting autopsies.
- 24 hours call coverage according to assigned division/s.
- Service productivity will be assigned according to the departmental compensation plan, previously approved by UHealth Compensation Committee.
- Participate in educational activities of pathology residents and fellows.
- Participate in educational activities of medical students.
- Participate in collaborative research opportunity to pursue basic/clinical or applied research, collaborate with other investigators throughout the Medical Center and seek sponsored programs funding from grants and contracts.
- Participate in daily quality assurance and in the Department of Pathology hospital committees and working groups.
- Maintain high standards of professional services so that the Department of Pathology will maintain the JCAHO/CAP/CLIA accreditation.

Requirements:

- MD/DO required.
- Board Certified or Board eligible in Anatomic Pathology or Clinical Pathology.
- Experience with Head and Neck desired.
- Must be licensed to practice medicine in the State of Florida.
